## Building Scalable Web and Mobile Solutions

A developer who enjoys turning ideas into fast, reliable, and beautiful software

I'm a full-stack developer passionate about creating modern, scalable web and mobile applications. Over the past few years, I've worked across different stacks, building everything from e-commerce marketplaces to real-time dashboards.

I enjoy working with both frontend and backend technologies — mostly TypeScript, Next.js, and .NET Core — but I also like diving into mobile development with Kotlin and Swift. My experience includes designing APIs, managing databases, and shipping production-ready apps ready to be used by thousands of users.

Recently, I've been exploring machine learning and AI integration into web systems. I like experimenting, learning new tools, and finding better ways to build things that actually work and scale.

### EXPERIENCE

MAY 2025 - PRESENT

#### Mashoor — E-Commerce Marketplace

Full Stack Developer (Full Time)

At Mashoor, I'm leading the backend migration from a Node.js/NestJS stack to ASP.NET Core. I work on both the seller and customer panels, integrating REST and GraphQL APIs and improving overall performance with caching and optimization strategies in Next.js.

Besides web, I also developed the mobile apps for the platform using Kotlin and Swift, ensuring a consistent experience across Android and iOS. I handle PostgreSQL data modeling with Entity Framework Core and manage state on the frontend with Redux Toolkit.

ASP.NET Core Next.js TypeScript PostgreSQL Entity Framework Core Kotlin Swift Redux Toolkit GraphQL

FEB 2024 - APR 2025

#### Blucka — Finance & Marketing Platform

Full Stack Developer (Part Time)

I built and maintained both the frontend and backend of Blucka's finance management tools. On the backend, I used Express.js and MongoDB with Mongoose for data modeling. I also created Telegram mini-apps and web integrations using Next.js, focusing on fast and user-friendly experiences.

Next.js Node.js Express.js MongoDB Mongoose Telegram API TypeScript

# Punky AI — Discord Bot Dashboard

Full Stack Developer (Part Time)

I built a management dashboard for a Discord bot platform, handling both the API layer and the frontend. Using Vue.js for the UI and Express.js for backend logic, I integrated real-time data from the Discord API, improving bot control and user experience.

Vue.js	Express.js	MongoDB	Mongoose	Discord API	JavaScript
--------	------------	---------	----------	-------------	------------

## TECHNICAL SKILLS

### Frontend

React, Next.js, Vue.js, TypeScript, Redux Toolkit, Framer Motion, Shadcn UI, TailwindCSS, Vite, Storybook, HTML/CSS

### Backend

ASP.NET Core, NestJS, Node.js, Express.js, FastAPI, Django, Spring Boot, SignalR, WebSockets

### Databases

PostgreSQL, MongoDB, MySQL, MS SQL Server, SQLite, Entity Framework Core, Prisma, Mongoose, Morphia

### API

GraphQL, REST, Swagger, JWT, OAuth, RBAC

### DevOps & Tools

Docker, Git/GitHub, AWS, Vercel, TurboRepo, Webpack, Bun, pnpm, npm, Maven, Gradle

### Languages

TypeScript, JavaScript, C#, Python, Java, C/C++, Kotlin

### Testing

Jest, Cypress, JUnit, Mockito, E2E, Unit Testing

### Other

Machine Learning (TensorFlow, Hugging Face), Telegram & Discord Bots, IoT (Arduino), PayloadCMS, React Native, Flutter, Figma

## CERTIFICATIONS

---

### C# (Basic)

HackerRank - e89056c50b67

### Java (Basic)

HackerRank - 23734843be8a

### JavaScript (Intermediate)

HackerRank - 3557c4d1922a

### Frontend Developer (React)

HackerRank - 9c676c0fe903

### Problem Solving (Basic)

HackerRank - 521ef418be4b

## LANGUAGES

---

**Turkish:** Native

**English:** Conversational

**German:** A1 Level

## BEYOND CODE

---

### Tennis

Active Player

### AI/ML

Deep Learning

Self-taught developer focused on practical problem-solving and continuous learning. Currently exploring deep learning to combine web development with intelligent systems.
